

Hydrometrix completed its first paperless meter audit and meter verification project in 1999 and has since become a leader in revenue enhancement and revenue protection in Southern Africa.

With decades of experience and intimate knowledge of utility meters and metering, we provide detailed visual, targeted, and remedial meter audit services. This helps to eliminate losses associated with theft, leakage and inadequate meter information systems. Our revenue enhancement and revenue protection interventions bring our clients several steps closer to the financial sustainability of their utility.

We provide our clients with a hardware and software solution for all their data capturing and analysis requirements. This includes the secure hosting of data on an interactive cloud portal, available for years after completion of a project.

In alignment with our mission of job creation and knowledge sharing, we recruit, train, and manage field staff from local communities. These teams are trained not only in data capturing, but also as ambassadors in water and energy sustainability awareness campaigns.

Clients

- Municipalities
- Water & electricity utilities
- Asset & revenue managers
- Consulting Engineers
- Consulting Chartered Accountants
- Prepaid utility vendors

Key Benefits

- Comprehensive, updated billing database
- Reduction in meter tampering
- Improved revenue collection
- Cost saving with our in-situ meter accuracy testing and verification
- Local job creation
- Local knowledge & resource awareness legacy

Experience & Track Record

- > 55 000 water meter audits
- > 100 000 electricity meter audits
- > 10 000 TID changes

All STS prepayment meters will be affected by TID roll-over by 24 November 2024
